SUMMARY

Production-focused Full-Stack Developer with 4 years of expertise in Flutter, PHP, and React, specializing in scalable mobile and web solutions for e-commerce, healthcare, and ERP systems. Proven ability to deliver secure, high-performance applications with a strong focus on SEO and cloud infrastructure. Available for immediate employment.

TECHNICAL SKILLS

- **Frontend:** Flutter, Dart, React, Vue.js, HTML/CSS, JavaScript, Typescript, AJAX, Bootstrap
- **Backend:** PHP, Laravel, Python, Django, FastAPI, Node.js, .NET (C#), RESTful APIs
- **Databases:** MySQL, MSSQL, PostgreSQL, MongoDB, Supabase
- **Cloud & DevOps:** AWS, Docker, Git, Azure, IIS, Github, CI/CD
- **Tools:** Firebase, OneSignal, Crashlytics, Razorpay, Stripe, Postman, Figma.

WORK EXPERIENCE

Software Developer, Ultimate Legendary Digital - Dubai, UAE

Jan 2026 - May 2026

Backend Development:

- Architected and built 300+ Laravel RESTful API endpoints for Opulent Influencer House, a global brand-influencer platform, implementing fully automated approval, rejection, and campaign management workflows to eliminate manual intervention.
- Developed secure Laravel PHP APIs for the Flutter mobile app covering influencer discovery, brand requests, and real-time status updates, integrating Stripe payment gateway with webhook handling and automated cross-border payout logic.
- Built a React admin panel with RBAC, enabling administrators to manage users, oversee campaigns, monitor platform-wide activity, and configure system-wide settings with granular permission control across all roles

Software Developer, Invoguo IT Solutions - Kerala, India

Mar 2023 - Nov 2025

Mobile Development:

- Built and launched 10+ cross-platform mobile apps using Flutter & Dart for e-commerce, vehicle rental, hotel menu systems, and healthcare industries.
- Integrated Firebase for real-time authentication, data sync, and cloud messaging, reducing crash rates by 35% via proactive monitoring with Crashlytics.
- Implemented secure payment gateways (Razorpay, Stripe, PayU) with PCI-DSS compliance, processing 10,000+ monthly transactions.
- Managed in-app update flows and version control, ensuring 95% user adoption of new releases within two weeks.

Web Development:

- Developed 15+ responsive, SEO-optimized websites using PHP, Laravel, and React, increasing organic traffic by 30% and improving search rankings.
- Built scalable ERP/CRM systems with role-based dashboards, streamlining data management and reporting for 3+ enterprise clients.
- Secured RESTful APIs using JWT authentication and SQL injection prevention, ensuring data integrity and compliance.
- Managed AWS cloud infrastructure and CI/CD pipelines, achieving 99.9% uptime and reducing deployment time by 40%.
- Established real-time error tracking using Sentry, enabling rapid debugging and reducing incident resolution time by 50%.

Python Developer (intern) , Inmakes Infotech Pvt. Ltd - Kerala, India

Jun 2022 - Dec 2022

- Developed scalable web applications using Python & Django, implementing MVC architecture, RESTful API integrations, and SQL query optimization, improving data retrieval speed by 25%.
- Built and deployed a CRM with user authentication, CRUD operations, and RBAC, while collaborating on a full-stack blogging platform integrating Django backend with frontend templates for seamless data flow.
- Ensured high code quality through unit testing, debugging, and code reviews, adhering to best practices while strengthening problem-solving and performance optimization skills across Django-based projects.

RECENT PROJECTS

Opulent Influencer House – Brand & Influencer Connect Platform

Backend Development:

- Designed and developed a scalable Laravel RESTful API backend powering a global platform that connects brands with influencers worldwide, implementing fully automated approval, rejection, and campaign management workflows to minimize manual intervention.
- Built secure Laravel PHP APIs for the Flutter mobile application, handling influencer discovery, brand campaign requests, and real-time status updates, while integrating Stripe payment gateway for cross-border transactions with webhook handling and automated payout logic.
- Developed a full-featured React admin panel with role-based access control (RBAC), enabling administrators to manage users, oversee campaigns, monitor platform-wide activity, and configure system settings with granular permission control.

Kars Rental Service - Car Rental App

Mobile Development:

- Led end-to-end development of two Flutter apps using Dart, Firebase, and REST APIs, handling everything from database design to Google Play Store deployment, with Google ML Kit face detection and Tesseract OCR for secure ID verification.
- Integrated payment gateways (Razorpay, Stripe) with PCI-DSS compliance and tokenization, improved performance via caching (Hive, SharedPreferences) and optimized API calls, reducing data load by 40% across all app features.
- Enforced role-based access control (RBAC), OTP authentication, real-time location tracking, trip monitoring, and background services, maintaining 95% crash-free sessions using custom APIs and proactive stability monitoring.

Web Development:

- Developed a full-stack web platform using React (frontend) and Laravel (backend API) with MySQL, building role-based admin panels for Super Admin, Host, and Staff with dynamic interfaces, real-time data updates, and secure dashboards for inventory, booking, and payment analytics.
- Implemented RESTful APIs with JWT authentication, SQL injection prevention, and audit logging, managing full deployment, SSL setup, domain configuration, and server maintenance for secure platform performance.

Leo Pharma & Medico – Order Management System

Mobile Development:

- Engineered four Flutter-based mobile applications for Leo Pharma and Medico (Leo Order Pro, Leo Order Retail, Medico Order Pro, Medico Order Retail), integrating Firebase for real-time sync, secure authentication, and cloud-based storage across all apps.
- Implemented RBAC to manage distinct workflows for sales staff, retailers, and admin users, and enabled offline functionality using local caching and background synchronization to ensure seamless order processing without internet connectivity.
- Published, updated, and maintained all applications on the Google Play Store, providing ongoing user support, performance monitoring, and regular updates to meet evolving business and compliance requirements.

Web Development:

- Developed and deployed a Laravel-based ERP/CRM system using MySQL and AWS, with RESTful APIs and JWT authentication, building CRM modules for user, client, and sales management alongside ERP features for inventory, order processing, and financial reporting.
- Implemented real-time analytics dashboards for sales performance, inventory levels, and order tracking, and managed AWS cloud infrastructure, SSL, and server maintenance for high availability and enterprise-grade data security.

EDUCATION

Bachelor of Engineering

Sep 2017 - Oct 2021

- Subject: Electrical and Electronics Engineering
- College: Cape Institute of Technology, kanyakumari, Tamil Nadu, India
- University: Anna University, Chennai

Higher Secondary (12th)

Jul 2015 - Apr 2017

- Subject: Computer Science
- School : Lourdes Matha Higher Secondary School, Edathua, Alappuzha, Kerala, India
- Board : Kerala State Board

ADDITIONAL INFORMATION

- **Languages Known:** English (Fluent), Malayalam (Native), Tamil (Fluent), Hindi (beginner).
- **Hobbies:** Trading stocks and cryptocurrency. Learning new technologies.
- **Soft Skills:** Problem Solving, Rapid Prototyping, Collaboration, Clean Code Writing, Efficient Prompting
- **Portfolio & More Project Details:** <https://anandhu-vijayan-panicker.github.io/profile>
